

RESPONSIBLE PALM OIL SOURCING POLICY

SCOPE

The present policy pertains to all palm oil and palm kernel oil products processed or handled at the Soya Hellas premises. These include palm oil, palm olein, palm stearine, palm kernel oil etc.

NDPE

Soya Hellas, as part of its overall sustainability policy, is committed to eliminating deforestation, to ecosystem conversion from its palm oil supply chain, and to safeguarding human rights across all of its operations and suppliers.

In pursue of this target, Soya Hellas demands full traceability to the mill for all palm products handled, assures that palm oil is produced in legally held land, and does not lead to deforestation or loss of peat land. Moreover, through all the supply chain the human rights are respected, including land rights, and no child labour is used. Specifically, palm oil development does not take place in primary forests, in high conservation value (HCV) areas, in high carbon stock (HSC) forests, and fire is not used in plantation operations.

RSPO

For RSPO certified products and for the corresponding raw materials, Soya Hellas follows the relevant "RSPO Policy" (POL.4)
